The Social, Economic and Political Effects of the Affordable Care Act

In countries such as Nigeria, Egypt and Indonesia, micro-entrepreneurs generate 38% of the gross domestic product. Yet, even as much of the economy is shuttered, some firms are expanding in response to pandemic-induced demand shifts. Subjective Social Indicators: Benefits and Limitations for Policy Making—An Introduction to this Special Issue.

Economic development

The legislation also called for adjusting taxable maximum amounts automatically on the basis of wage growth. However, the old-age insurance program—the precursor to today's Old-Age, Survivors, and Disability Insurance, or Social Security, program—was not designed specifically to deal with the economic crisis of that era.

How social science shapes lives

This strategy is based on the variation in travel from the epicenter of an outbreak to other locations that were not previously infected.

Education vital for social mobility

The authors use customized surveys on a panel of more than 10,000 Americans before, and at the onset of, COVID-19 to show that the share of Americans not actively looking for work because of retirement increased by 7 percentage points between January and early April of 2020.
