### **Kant on Friendship**

The third great question of the critical philosophy is, What can I hope for? After all, if the value of friendship in general lies in the way it contributes either instrumentally or constitutively to a flourishing life for me, then it might seem that I can justify particular friendships in light of the extent to which they contribute to my flourishing. And it is a necessary means of doing this that a practice of taking the word of others exists, so that someone might take my word and I take advantage of their doing so. Love of benevolence consists in the wish and inclination to promote the happiness of others.
