**73rd Report, 2015 (Session 4):  
 Subordinate Legislation : Scottish  
 Parliament**

The choice of instrument may have significant drafting implications, but the variations make generalisation difficult. Consequently, the legislation that has to be passed by the Legislature is so vast and varied that is impossible for any body of legislators to deliberate upon, discuss and approve every little detail of legislation which may be necessary for proper administration.

### The Scottish Parliament

Consequential amendments have also been prepared in respect of paragraph 1 ga and gb of schedule 3 to the Bill.

### Committee On Subordinate Legislation UPSC Notes

Similarly, the Committee noted that there appeared to be no power to amend the sum of £5,000 in new section 20E 1 b of the 1980 Act, although section 38 1A b provides for a specific power to amend the same sum specified in section 55 1 bc of the Act. This should appear at the foot of the general empowering provision.

### Subordinate Legislation Committee

Although the Committee does not like to question the powers conferred by Parliament through a statute, it can certainly while examining the subordinate legislation issued thereunder, take note that the powers are not abused. That is provided for by s 11 of the draft Interpretation Act—an amending enactment is to be read as part of the enactment which it amends: see para 108.

### 65th Report, 2013 (Session 4): Subordinate Legislation

Proposals to give effect to the detail of the legislative scheme by legislative instruments other than regulations should be based on a clear understanding of the comparative advantages of those forms over the more usual regulations.

## **Regulatory impact assessment code for subordinate legislation**

The Committee aims far beyond that as the ultimate goal of all legislation including subordinate legislation is the larger public good. A46 The commencement provision in regulations should be separate from the enactment and title provision.

### **Subordinate Legislation Committee**

If, however, the Deputy Speaker is a member of Committee, he is appointed the Chairman. The commencement of enactments which by definition, in s 19 of the draft Interpretation Act, includes regulations, rules and bylaws is provided for in s 4 of the draft Interpretation Act, subs 1 of which states that, in the absence of contrary provisions, enactments come into force 28 days after the day on which they are assented to or made. EPA and Department of Environment Land Water and Planning worked together to develop the proposed Regulations and ERS in consultation with community, government and industry stakeholders.
