**The mammals of China and Mongolia**

Daohugou has yielded many fossil insects, animals and plants.

## List of mammals of China

They are often found in elevated forests and are well adapted to cold temperatures. Li Fabaceae , a new species from Inner Mongolia, China, is described and illustrated.

## **The mammals of China and Mongolia : Allen, Glover M. (Glover Morrill), 1879**

Bat species account for about 20% of all mammals.

## **Wild Bactrian camel**

Cambridge, Massachusetts: Harvard University Press. All existing dromedary camels are domesticated.

## **The mammals of China and Mongolia**

The major threats that this species currently faces is from its small population, limited distribution, the risk of hybridization with domestic horses, and infectious disease. The expedition lasted 10 years, and resulted in a series of papers and published volumes, intended to number 12 but not all of which were published.
