## Rural Water Supply & Sanitation Initiative

Project Area In Punjab, target area is 2000 villages in 16 districts including: Khushab, Mianwali, Sargodha, Chakwal, Bhakkar, Pakpattan, Chiniot, Jhang, Rajanpur, Rahim Yar Khan, DG Khan, Lodhran, Bahawalpur, Muzzafargarh, Bahawalnagar and Multan. The initiative is being coordinated by the Ministry of Drinking Water and Sanitation in close coordination with other key ministries as well as states, cities, and sites managers.

## Rural Water Supply and Sanitation

The initiative provided water supply and sanitation access to an estimated 135 million and 90 million people respectively. The Green Forum is an online interactive community space for professionals to share and discuss insights in the pursuit of a sustainable economic transition.

## Punjab Rural Sustainable Water Supply and Sanitation Project

However, the evaluation did not find any impacts significant at standard levels of confidence for any of the diarrhea incidence indicators analyzed, although most of the estimated effects have the negative expected sign. As an outcome of this assessment, this Environmental and Social Management Framework ESMF has been prepared.

## Punjab Rural Sustainable Water Supply and Sanitation Project

This, in turn, should help the MCC fulfill its mandate of reducing poverty through economic growth by allowing household members to be more productive and generate more income than they would have in the absence of improved access to cleaner water. It has also provided examples of successful multi-stakeholder collaborations that have strengthened existing partnerships and promoted avenues for new collaborations among international organizations, governments and local communities. The actions taken at these initially selected 10 iconic places are expected to provide practical insights and standards to be shared with and further adapted by other iconic places and cities across India.

## Rural Water Supply & Sanitation Initiative

The 2021 RWSN Mentoring programme is open to all RWSN members and free of charge, thanks to the financial support of SENSE

Foundation. In terms of policy implications, the results described in this report imply that this type of program can have major impacts on households wellbeing via reductions on time spent collecting water, but limited effects on higher level outcomes, like diarrhea incidence. Component two will benefit women and marginalized communities who currently do not have access to water and sanitation toilet in the household within existing schemes.

### **Punjab Rural Sustainable Water Supply and Sanitation Project**

Instead, it needs to be driven by changing behavior at the community level.
