## Diatom, Chrysophyte and Protozoan Distributions along a Latitudinal Transect in Fennoscandia on JSTOR

The conservation challenges presented by recent bison movements are also occurring in a multiple-stressor context. The structural integrity of the open pits is constantly monitored to ensure that the walls have not been breached by water from the lake, which would cause flooding of the underground workings.

## Physical and chemical limnology of northern boreal lakes, Wood Buffalo National Park, northern Alberta and the Northwest Territories, Canada

Further study is ongoing to resolve the underlying mechanisms of lake expansion in this region. Overall accuracy of the classification was 91% with the two important winter forage habitats — sedge meadow and willow savanna — having accuracies of 95% and 75% respectively.

## Diatom, Chrysophyte and Protozoan Distributions along a Latitudinal Transect in Fennoscandia on JSTOR

. The local vernacular is as colourful as the bright houses lining sloping streets, and the residents are the most welcoming people we have ever met.

## Gordon Lake Property

This meant moving building materials, machinery, heavy equipment, and supplies over long distances to the mining sites over a period of many years. . Summers at the site are short and cool, while the winters are long and extremely cold.

## Seismic activity near Yellowknife misidentified, Geological Survey says

SYSTAT: The system for statistics.

## **Primary production and related limnological data for some lakes of the Yellowknife, N.W.T. area**

The dikes determined the depth and dimensions of the open pits and the point at which the mine transitioned to underground operations.  
Department of Geological Sciences, Queen's University, Kingston, Ontario 1974. CANOCO: a FORTRAN program for canonical community ordination.

### **Seismic activity near Yellowknife misidentified, Geological Survey says**

Elemental analysis organic carbon, nitrogen and stable isotope analysis  $\delta$  13C,  $\delta$  15N in sediments was conducted following methods outlined in Korosi et al.

### **Arsenic in sediments, water and aquatic biota from lakes in the vicinity of Yellowknife, Northwest Territories, Canada**

This regional map of northern Canada shows the locations of Diavik and other diamond mining operations. Physical and chemical limnology of 59 lakes located between the southern Yukon and the Tuktoyaktuk Peninsula, Northwest Territories Canada.
