**National Development Council: National Development Council to discuss shortage of doctors, nurses**

The focus of our health care should change to strengthening the LGA with emphasis on the PHC.

**Myanmar's human resources for health: current situation and its challenges**

A shortage of nursing school faculty is restricting nursing program enrollments. There are also better outcomes for quality care because the nurses listed in the banks are loyal to that organisation and they understand the process and protocol of the organisation.

**HPSA Find**

If this is being considered, this should be used only as a bridge to longer term strategies that do involve care of uninfected patients by potentially infectious HCP and strict adherence to all other recommended infection prevention and control measures e. Health Resources Services Division predicted only 16 states would see shortages by 2025, due to a distributional imbalance.

**Chapter 2**

The serious persistent shortage of health workers across all the PHC centres was mocked by a Chief Nursing Officer CNO during the interview.

**Five strategies to manage talent shortages**

Figure shows the various views of the health workers about the effectiveness of the prenatal care services rendered to women in the PHC facilities across the five local government areas.

**Myanmar's human resources for health: current situation and its challenges**

Solution: Healthcare executives including nurse leaders must learn new skills for valuing employees. These include: Adjusting staff schedules, hiring additional HCP, and rotating HCP to positions that support patient care activities. They told the interviewer that only the last two that is, primary health care centres and comprehensive health centres provide maternity care services.

### **The Challenges of Nursing: Short Staffing**

The purpose of this article is to review several factors contributing to the shortage and present possible strategies to address them. The Ministry grouped the country into 11 clusters each consisting of 3 to 10 counties depending on the geographical distribution, namely, Lake Basin, Western, North Rift, South Rift, Central, Eastern, North Eastern, Coast, Central, and Eastern regions, which were divided into two clusters each because of the vast landscape within the counties. The Ministry of Health and development partners of health in Kenya undertook training needs assessment TNA in September 2015, which assessed the overall gap of health specialists as per the standard numbers that have been set as well as the ideal numbers as perceived by the County Directors of Health Table.
