The production of hybrid laminates by coupling layers of glass fibre reinforced with jute reinforced laminates, proved also effective to improve the mechanical characteristics. The presence of ultrasonic during the precipitation process had reduced the size to 383. However, the continuous milling has caused the particles to agglomerate as a way to release the excessive specific surface energy and micro strains produced by high-energy ball milling.

## Hennessey (Kathleen) papers

A tollhouse was built that year on the Cheddleton road near Sheephouse Farm.
