90% of EU funding for forests comes from the European Agricultural Fund for Rural Development EAFRD. Forest coverage varies considerably from one Member State to another: while forests in Finland, Sweden and Slovenia cover nearly 60% of the country, the equivalent figure is only 8%.

### Creating a sustainable food system: the EU's strategy

The PRI served as an Observer, providing technical input on many of the recommendations.

### Creating a sustainable food system: the EU's strategy

**Background** The green transition is one of the key priorities of the , aiming to ensure that sustainable products are available to consumers on the EU market and that consumers have better information to be able to make informed choices.

### European Commission launches Green Consumption Pledge, first companies commit to concrete actions towards greater sustainability

By 2023, the Commission will present a legislative framework that will establish common general principles and requirements for sustainable food systems and products. The proposed regulation establishes the conditions and the framework to create, over time, a unified classification system or taxonomy on what can be considered environmentally sustainable economic activities.

### Forests

The PRI issued an initial assessment of the 10 reform areas in the action plan.

### A European Green Deal

The common agricultural policy CAP , the main source of EU funds for forests Some

## **The European Union and forests**

Abiotic and biotic threats — challenges exacerbated by climate change The abiotic i.
