## National, regional, and global trends in body

Third, for each year between 1950 and 2099 in the CMIP5 Historical, RCP4. Subsequently, it has been discovered that all tissues and organs produce specific magnetic pulsations, which have come to be known as biomagnetic fields.

## Changes in food and nutrient intake of 6

A handful of countries get around half or more of their energy from nuclear and renewables. Production only was going up the last few years due to the fact that most companies hedge their production several years out with financial contracts.

## Cost of Solar Power vs Cost of Wind Power, Coal, Nuclear, & Natural Gas

Some us LNG and some CNG. CO2 — not gonna get solved in the next 20 years.

## Basal metabolic rate studies in humans: measurement and development of new equations

The difference is that in Figure 2, I am figuring out how much is available, per person.

## 1980s oil glut

Peak oil theory would seem to imply that falling EROEI would result in falling, not rising productivity, first in the energy sector, but eventually infecting the entire economy.
