## Constructing an Effective Maintenance Plan

She can be reached at.

## Plant

There is usually no value in aiming maintenance at the effect of a failure.

## SAP Standard Reports

This article explains what makes the difference between an ordinary maintenance plan and a good, effective maintenance program.

## Generating Availability Data System

Shop floor Maintenance 87 Damage analysis By machine By damage code MC15 This report can be used to extract the information on damage analysis Shop floor Maintenance 88 Breakdown analysis By machine By machine group MC17 This report can be used to extract the information on breakdown such as number of break down, MTTR, MTBF Shop floor Maintenance 89 Maintenance cost analysis By machine By machine group MC18 This report will be used to extract information on planned cost and actual cost for different type of breakdown Shop floor Maintenance 90 Customer notification analysis MCIA This report can be used for reporting customer notifications. Shop floor Production 49 Material usage analysis By plant By material By component used By order MCRE This report can be used for analysing the actual material usage against plan in manufacturing process. Regardless of the approach that has been used to record the original analysis, it is worth it in the long run to force the reliability engineers to route every amendment through the analysis and record the results for future reference.

## Constructing an Effective Maintenance Plan

Vrain plant is currently operating at Platteville, Colorado. The concept incorporates inherent HTGR safety characteristics a multiply redundant prestressed concrete reactor vessel PCRV , a graphite core, and an inert single-phase coolant and engineered safety features core auxiliary cooling, relief valve, and steam generator dump systems.
