### The Politics of Global Warming

The election of Donald Trump in 2016 led to the United States declaring it would withdraw from the Paris treaty. In the Servitude of Power: Energy and Civilisation Through the Ages. As of 2017, the United States and Europe accounted for just over 50 percent of cumulative CO<sub>2</sub> emitted into the atmosphere since 1850.

### Climate politics: How fears of socialism drive climate denial

As global warming gained currency as a real phenomenon, researchers dug into possible ramifications of a warming climate. Global warming or climate change is toward the bottom

### Climate Change and Capitalism: A Political Marxist View.

Evidently, the warming experienced up to now does not qualify as a cataclysm. That danger, the activists say, is still in the future. For all the invective, some experts see an ongoing shift in the climate debate in which Heartland may be a lagging indicator of political and social change. In the 1800s, experiments suggesting that human-produced carbon dioxide CO<sub>2</sub> and other gases could collect in the atmosphere and insulate Earth were met with more curiosity than concern.

### Climate politics: How fears of socialism drive climate denial

Public priorities on environmental protections have risen over time. Flooding in Southeast Texas from Hurricane Harvey.

### Mitigation and Adaptation

For various reasons, acceptance of climate science breaks down along ideological lines. Consequently, it enables more work to be done—more materials transformed — than muscle power alone, or even wood or water—the dominant fuel sources in the nascent English industrial economy.

## **How Climate Change Impacts the Economy**

As grasses can survive for longer as the sheep eat them than woody plants and herbs, the transition from heathland to grassland can make conditions more favourable for sheep grazing as the sheep have more to eat. However, emissions increased in 2018, which suggests that sound policy will be needed to continue making progress Rhodium Group 2019.

## **Five Key Findings from Why Forests? Why Now? The Science, Economics, and Politics of Tropical Forests and Climate Change**

About half or more consider climate change to be a very serious problem; public concern about climate change is up since 2015 in places where a previous Pew Research Center survey is available.
