Distributed generation is most commonly used to insure that sufficient energy is available to meet peak demand.

Reports and Publications — SRB&A

This study was designed to facilitate the development of community and regional-based mitigation plans that address social, cultural, fiscal and economic concerns about future spills in Prince William Sound, Lower Cook Inlet, and Kodiak Island. Aqqaluk Cultural Sites 2010 Monitoring, Red Dog Mine.

Projects

Hanrahan related that the funds would be used to keep the registration fee for participants at a level that was attainable to allow Alaskan youth to participate in the Arctic Winter Games. This is accomplished through educational programs such as alcohol and drug abuse prevention programs, fetal alcohol syndrome prevention programs, and child development programs; adult training; affordable housing programs; advocacy for low-income individuals and instruction on how to advocate for themselves. Tuck, Ralph, 1937, The Eska Creek coal deposits, Matanuska Valley, Alaska: U.
