## REGDOC

The licensee shall identify and classify SSCs. He joined the Department of Civil Engineering at Carleton University, Ottawa, Canada in 1975 as Assistant Professor, became Professor in 1981 and Head of the Department from 1982 to 1991. A member of the International Scientific Advisory Board of the CEA PRECCI Programme, Mr.

## Waste management

Active controls may be followed eventually by passive controls, which will ensure that knowledge of the disposal site is maintained and that future uses of the site are controlled.

## Nuclear Engineering (Master's program)

In situations where acceptance requirements for disposal are not yet available, the licensee should develop waste acceptance criteria with reasonable assumptions about the anticipated disposal option. Decay storage The licensee should segregate radioactive waste designated for decay storage from other waste, from the point of generation to its final disposal. The licensee shall ensure that any changes to design during construction are subject to change control.

## Thermal Behaviour of Backfill Material for a Nuclear Fuel Waste Disposal Vault

Here is a look back at the top stories of 2020 from our Waste Management section in Newswire and. The licensee shall conduct storage activities in accordance with its documented procedures.

## The Atomic Energy of Canada Limited Underground Research Laboratory: An Overview of Geomechanics Characterization

Congress has failed to uphold its promise to fully fund Yucca Mountain, in Nevada, as a permanent repository for spent nuclear fuel, published on December 8 in the Dallas Morning News.

## **Waste Management**

The ITRG submitted regular impartial reports on the NWMO's technical program

### **A.P.S Selvadurai**

The objective of the Master of Engineering MEng program is to provide the opportunity for engineers in industry to upgrade and expand their skills, including developing research skills. In 1993, he was invited by McGill University to become Chair of the Department of Civil Engineering and Applied Mechanics, a position he held until 1997. Radiation shielding, environmental emissions, and product waste acceptance requirements were all tested and validated during the commissioning phase of the SWPF, the DOE announced on January 19.

## **Waste Management**

Internal awards and funding Applicants to research-based graduate programs who are studying full-time are automatically considered for some types of funding at the time of admission. This chapter provides an overview of geomechanical characterization in the atomic energy of Canada Limited. All licensees that have a waste management program are subject to the requirements in sections 4, 5, 6, 7 and 8 of this regulatory document.
