33 CFR § 155.1020

The number of incidents and volumes of oil spilt are recorded based on the most up to date information.

Ship to Ship Transfer (STS) + Lightering

The key elements of vessels and special systems are vessel design, mooring systems, fendering systems, and hoses and transfer systems. Regardless of whether and how these issues are addressed, industry standards and guidelines will continue to be voluntary. The post-transfer phase includes operations associated with the unmooring and departure of the service vessel.

OCIMF Oil Companies International Marine Forum

Oil Spill Risks From Tank Vessel Lightering

Foreign tank vessels must have a valid tank vessel examination letter TVEL issued by the Coast Guard.

Ship to Ship Transfer (STS) + Lightering

Additional guidelines and standards have been established by lightering companies, major tanker operators, and other industry entities. The problem could grow in the future.

Concho

For the purposes of this subpart only, the term Adverse weather means the weather conditions that will be considered when identifying response systems and equipment in a response plan for the applicable operating environment.
