You can choose the 4-key layout, never learn the rest and you still get 60% of the reduction in finger travel and same-finger repetition offered by Dvorak.

## Minimaks

It takes days, weeks even, just to get to a speed at which you can perform work... barely and with frustration. A čale ga je ovako vukao svuda, htelo da mu učini jer je imao tri sina a to mu je jedini posao bio. What's the most efficient way to learn a new layout that approximates the performance of the other layouts and lets you type QWERTY without difficulty? Kad nekog volim, volim ga, kad nekog mrzim mrzim ga.
