Introduction to Environmental Science Lecture Powerpoint Purpose: This Powerpoint presentation is designed for the first class of a survey Environmental Science course. Certain fundamental concepts that will reappear multiple times throughout the year will also be taught here. Attendance will be taken at the beginning only of each class by sign-in sheet.

Introduction to Environmental Science

Introduction to Environmental Science: This course is an exploration into the science that directly affects us all on a daily basis, and that will likely increase in its significance to us with time. This outline gives students a means to take notes that guides them toward important concepts and avoids the pitfalls of writing word-for-word or simply not taking notes at all.

Take Home Quiz will be provided to students on the first day of class. Worldviews also determine what questions are valid to ask.

Introduction to Environmental Science Powerpoint Lecture

The lab version includes required local field trips. You'll also get to discover the scope of the field. This does not serve as a prerequisite for any other courses.

Introduction to Environmental Science

Student will be mentored by a faculty member. Introduction to Environmental Science - Chapter Summary and Learning Objectives What is

environmental science? As members of society and the Earth, we are collectively responsible for environmental impacts and must also be responsible for making educated decisions when influencing environmental issues, electing policy making officials, and choosing lifestyles.

Introduction to Environmental Science

This course will expose the student to potential solutions as well as the limitations of these solutions due to science, technology, cultural beliefs, political systems, and resource availability. The field of environmental justice combines civil rights with environmental protection to demand a safe and healthy environment for everyone. The objective is to not only educate yourselves, but to be an advocate for your organization and educate your classmates about your organization.
