Research topics — Faculty of Engineering and Architecture

After gelation, the matrix is a rubbery viscoelastic solid with short relaxation times.

Topics in Engineering Mathematics

Computational models intelligently gather, filter, analyze and present health information to provide guidance to doctors for disease treatment based on detailed characteristics of each patient.

Mathematical Modelling

The height of arbitrariness and injustice is reached when certain people, such as physicians or legislators, arrogate to themselves the power to decide who ought to live and who ought to die.

Advanced Engineering Mathematics

Among the various forms of adoption, consideration should be given to adoption-at-a-distance, preferable in cases where the only reason for giving up the child is the extreme poverty of the child's family.
