Book Synopsis
The best-selling introduction to statistics for students in the behavioral and social sciences, this text continues to offer straightforward instruction, accuracy, built-in learning aids, and real-world examples. The goal of STATISTICS FOR THE BEHAVIORAL SCIENCES, 9th Edition is to not only teach the methods of statistics, but also to convey the basic principles of objectivity and logic that are essential for science and valuable in everyday life. Authors Frederick Gravetter and Larry Wallnau help students understand statistical procedures through a conceptual context that explains why the procedures were developed and when they should be used. Students have numerous opportunities to practice statistical techniques through learning checks, examples, step-by-step demonstrations, and problems.

Such standards provide for comprehensive coverage of Algebra 1 and its prerequisites, but do not cover non-algebra mathematics topics, such as probability, statistics, and geometry.

STATISTICS FOR THE BEHAVIOR SCIENCES

Statistics is one of the most practical and essential courses that you will take, and a primary goal of this popular text is to make the task of learning statistics as simple as possible. This combination makes the text perfect for students taking their first statistics course in psychology or other social and behavioral sciences. Content can be highly customized to match almost any curriculum and order of instruction.
