Writing with Computers Too Easy

After several bad experiences, I can testify that the consumer-grade motherboard RAID systems are nothing like their enterprise-class counterparts. A secure network is not only a first step towards protecting your computers, but will also protect the mobile devices that connect to your home network. The collaborative environment that wikis facilitate can teach students much about how to work with others, how to create community, and how to operate in a world where the creation of knowledge and information is increasingly becoming a group effort.
