'Let's explore new dimensions for literacy development'

Perhaps the only prediction that can be offered with certainty is that the impact of technology is irreversible. For those many states and districts that are struggling to find ways to measure performance in non-tested grades and subjects, well-designed student surveys should be an attractive option for supplementing classroom observations. There is little discussion in the book of emerging perspectives on multiliteracies, or of how electronic communication technology might be important in understanding the literacy worlds of contemporary childhoods.
